

2014-11-19

To whom it may concern:

In order to keep consistent with products which sales to market, we change the external photos.

We only changed the power cord appearance; and the change is removing the screw-type wire connectors on the power code. We confirm that screw-type wire connectors be used for EUT's power cord without EMI suppressor; and the product's cable length as the EUT's is 2 meters.

We'll be responsible for any consequences caused by other change in the Gavita Pro 1000 DE US. FCC ID:2ADC61861112421.

Sincerely, Nico Romers
